Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Detailed Action

Claim Objections

1. Claim 1 is objected to because of the following informalities: Claim 1 had two sentences and should only have one; claim 1, line 2, "Portable" should be lower case. Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claim 1 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The "hem" is described in the present application on page 5, lines 7-10. The Office needs to know what is a "hem"? Where is it located in the drawings?

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 3754

4. The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

5. Regarding claims 1,4,3, the phrase "such as" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

6. Claim 1 recites the limitation "discharge pipe" in line 11. There is insufficient antecedent basis for this limitation in the claim.

7. Claim 1 recites the limitation "hem" in line 8. There is insufficient antecedent basis for this limitation in the claim.

8. Claim 2 recites the limitation "motor" in line 14. There is insufficient antecedent basis for this limitation in the claim.

9. Claim 3 recites the limitation "ball bearing" in line 19. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102.

10. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3754

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

11. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Hessert (2,337,161).

The Hessert reference discloses a portable ice cream dispenser having a screw groove (72), an activation plate (76), a packing member (fig.1), a bottom discharge (adjacent screw (34)), a motor (66), a container (c), and wherein the ice cream is placed into a cardboard container (77), a cover (16), a lever (75), and a switch (80).

Conclusion

12. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Brubaker (1,704,784), McGill (5,893,485), Alpers et al. (5,816,455), Arthur (2,559,840), Patton (1,562,250).
